Reagent: Anti-HIV-1 MN/RF gp120 Polyclonal (PB1 MN/RF)

Catalog Number: 41

Lot Number: 10

Provided: 200 µl undiluted antiserum

Host: Goat

Description: This antiserum was raised against both the HIV-1 MN gp120 PB1 domain (aa 295-474) and the HIV-1 RF gp120 PB1 domain (aa 295-474).

Special Characteristics: Antisera were raised against various baculovirus-derived HIV-1 envelope proteins. Please see the linked table for a list of the polyclonal antibodies.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Division of AIDS, NIAID; produced under contract by Repligen. The molecular clones used to express the recombinant antigens were provided by Dr. Robert Gallo, Laboratory of Tumor Cell Biology, Division of Cancer Etiology, NCI.

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: (specify reagent)." Also include the first three references cited below in any publications.
