Reagent: J-Lat Full Length Cells (6.3)
Catalog Number: 9846
Lot Number: 160150
Release Category: C
Provided: 1 mL of cells
Post thaw cell count = 4.9 x 10^6 cells/mL
Post thaw cell viability = 89%
Cell Type: Jurkat - T lymphocyte cell line
Propagation Medium: RPMI 1640, 90%; FBS, 10%; supplemented with penicillin G (100 U/ml), streptomycin (100 µg/ml), L-glutamine (2 mM).
Freeze Medium: FBS, 90%; DMSO, 10%.
Growth Characteristics: No special requirements, split 1:3 at 1 x 10^6 cells/ml. Cells grow in suspension, usually singly but some clumping has been noted.
Morphology: Small, spherical cells in suspension. Morphology usually does not vary.
Sterility: Negative for bacteria, mycoplasma, and fungi
Description: This is a Jurkat-based cell line containing a full-length integrated HIV-1 genome that expresses GFP upon activation. The genome generates incomplete virions due to a frameshift in env.

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
Jurkat cells were infected with the packaged retroviral construct HIV-R7/E-/GFP, which is full length HIV-1 genome with a non-functional Env due to a frameshift, and GFP in place of the Nef gene.

Full-length constructs secrete incomplete viral particles (capsids). The cells express low to undetectable levels of GFP under basal conditions. Suited to study HIV latency and reactivation.

The clones in this series are: 6.3 (cat# 9846), 8.4 (cat# 9847), 9.2 (cat# 9848), 10.6 (cat# 9849), and 15.4 (cat# 9850).

Please see Table I in the reference publication for differences between these clones in GFP and p24 expression upon stimulation with TNF-α.

Keep the reagent in liquid nitrogen.

Dr. Eric Verdin

Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: J-Lat Full Length Cells (6.3) from Dr. Eric Verdin (cat# 9846)." Also include the reference cited above in any publication.

These cells and methods of use are covered by US Patents 7,232,685 and 7,544,467.

Scientists at for-profit institutions or who intend commercial use of this reagent must contact the J. David Gladstone Institutes, Email: veronica.viray@gladstone.ucsf.edu, before the reagent can be released. Please specify the name and a description of the intended use of the reagent.
