Reagent: J-Lat Tat-GFP Cells (H2)

Catalog Number: 9855

Lot Number: 040942

Release Category: C

Provided: 1.0 x 10^7 cells. Viability = 94%.

Cell Type: Jurkat - T lymphocyte cell line

Propagation Medium: RPMI 1640, 90%; FBS, 10%; supplemented with penicillin G (100 U/ml), streptomycin (100 µg/ml), L-glutamine (2 mM, 0.3 mg/ml).

Freeze Medium: FBS, 90%; DMSO, 10%.

Growth Characteristics: No special requirements, split 1:3 at 1x10^6 cells/ml. Cells grow in suspension, usually singly but some clumping has been noted.

Morphology: Small, spherical cells in suspension. Morphology usually does not vary.

Sterility: Negative for bacteria, mycoplasma, and fungi.

Description: These cells are Jurkat cells that bear the integrated retroviral construct LTR-Tat-IRES-GFP.

Special Characteristics: Jurkat cells were infected with viral particles bearing the retroviral construct LTR-Tat-IRES-GFP. Cells that were GFP negative, but could be stimulated to express GFP were selected. For the other similar cells, please see cat#s 9846-9856.

Recommended Storage: Liquid nitrogen

---

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.
