Reagent:  
17193057/C BB10 plasma

Catalog Number:  
12522

Lot Number:  
140101

Provided:  
0.5 mL of plasma. The plasma has not been heat-inactivated.

Host or Host Site:  
Human

Sterility:  
Not tested

Description:  
Plasma collected from an individual infected with subtype C HIV-1. Subtype was determined by sequencing both the gag and env regions.

Recommended Storage:  
Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor:  
Lynn Morris
