Reagent: 17521658/C BB22 plasma

Catalog Number: 12523

Lot Number: 140102

Provided: 0.5 mL of plasma. The plasma has not been heat-inactivated.

Host or Host Site: Human

Sterility: Not tested

Description: Plasma collected from an individual infected with subtype C HIV-1. Subtype was determined by sequencing both the gag and env regions.

Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

Contributor: Lynn Morris

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Catalog #12523, 17521658/C BB22 plasma from Lynn Morris."
