Reagent: 17646959/C BB72 plasma

Catalog Number: 12526
Lot Number: 140105
Provided: 0.5 mL of plasma. The plasma has not been heat-inactivated.
Host or Host Site: Human
Sterility: Not tested
Description: Plasma collected from an individual infected with subtype C HIV-1. Subtype was determined by sequencing both the gag and env regions.
Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor: Lynn Morris

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Catalog #12526, 17646959/C BB72 plasma from Lynn Morris."
