Reagent: 17721736/C BB106 plasma

Catalog Number: 12528
Lot Number: 140107
Provided: 0.5 mL of plasma. The plasma has not been heat-inactivated.
Host or Host Site: Human
Sterility: Not tested
Description: Plasma collected from an individual infected with subtype C HIV-1. Subtype was determined by sequencing the gag region.
Recommended Storage: Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.
Contributor: Lynn Morris

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: Catalog #12528, 17721736/C BB106 plasma from Lynn Morris."
