DATA SHEET

Reagent:                  SIVmac251 Control Serum
Catalog Number:          2774
Lot Number:              2 95018
Provided:               500 µl undiluted antiserum.
Host or Host Site:       Rhesus monkey.
Special Characteristics: Pooled serum from normal rhesus monkeys. Negative reactivity with SIVmac by
                         ELISA against rgp110 at
Recommended Storage:    Keep at 4°C for short term storage and -80°C for long term storage. Avoid
                         freeze-thaw cycles as reagent degradation may result.
Contributor:             Drs. Keith Reimann and David Montefiori.

NOTE:                   Acknowledgment for publications should read "The following reagent was obtained
                         through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: SIVmac251
                         Control Serum from Drs. Keith Reimann and David Montefiori."
