Reagent: HIV env 405-423 (Z3)
Catalog Number: 702
Lot Number: 93015
Provided: 1 mg, lyophilized
Sequence: TGNITLPCKTVRVTWQG
Analytical Test: HPLC, estimated purity: >95%
Solubility: 1 mg/ml in phosphate-buffered saline.
Special Characteristics: Activity is unknown. Peptide is not recognized by some DR4-restricted T cells specific for corresponding region of IIIB gp120. Peptide does not bind to DR4.
Recommended Storage: -20°C, lyophilized and under N₂. After resuspension, store at -70°C.
Contributor: Dr. Robert F. Siliciano

NOTE: Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, AIDS Program, NIAID, NIH: Synthetic peptide HIV env 405-423 (Z3) from Dr. Robert F. Siliciano (cat# 702)." Also include the above references in any publications.

Limited to one mg per laboratory.
